Press release

RHEINTACHO Group – The success story goes on! Sales record in 2017

After a very good year in 2016, both RHEINTACHO Messtechnik in Freiburg, Germany and RHEINTACHO UK in Leeds, increased their sales by more than 25 % in 2017.

Several large new contracts and many new developments in sensors enabled to tackle the increasingly difficult international sensor market with great success and also provide a very positive outlook for the future. Significant new developments include two sensor series which integrate more than the traditional rotational speed detection. The M8 series now includes a temperature sensor and the ABZ series can not only measure rotational speed but also the direction of rotation as well as position! The additional features offer not only technical but also cost advantages to users. Further developments in this area are nearing the launch of sales. Both innovations will be present at the Hanover fair CeMAT.

A spectacular feature will be present in a new version of the hand stroboscope RT STROBE pocketLED in Hanover: The auto-sync function using a laser beam and a clever signal-receiving.

The subsidiary RT UK in England with the bespoke craftsmanship present in Leeds, Yorkshire continues to be a specialist in the production of mechanical and electrical instruments and tachometers. Together with over 110 years of experience available from the German parent company and its own combination of over 200 years of experience from Foundrometers Instrumentation and Hardings of Leeds, history is accompanying the RHEINTACHO group into the future.

RHEINTACHO UK has specialized in the development of ATEX products. These are often used in areas where there is sometimes a risk of explosive atmospheres due to either dust particles or gases. As the newly appointed ATEX competence center within the RHEINTACHO Group, they are currently developing ATEX versions of some well-proven and established products.

At RHEINTACHO, we find solutions for your challenges.

Press release

The success story goes on

RHEINTACHO Messtechnik GmbH is a company with longstanding tradition and has been engaged since 1901 in the field of rotational speed, a crucial control quantity for mechanical processes. Just over 70 employees are employed at the company's headquarters in Freiburg. In-house product development, production and assembly departments guarantee quick and innovative solutions to customers' individual requirements. The production range incorporates a wide range of solutions of a high technical quality, principally in the field of rotational speed: sensors, hand-held measuring devices, rotary encoders and switching devices. RHEINTACHO UK Ltd, a subsidiary of the German company RHEINTACHO Messtechnik GmbH, is specialized in the production of non-electronic measurement and indication instruments, and acts as a sales and service center for the UK and Ireland.
